

# Help for vote registration and for election closure

---

You are in the sixth stage of the electoral process.

In this stage you can :

- Scan the barcodes of the cast votes.
- Close the election.

The taskbar contains the following options :

- Go to menu
- Install voting machines
- Report a technical incident
- Manage poll workers
- Manage the comments of the poll station's president
- Recreate the ballots where the barcode is unreadable
- Manage the election statistics

Thanks to this vote scanning process, you can validate each vote cast by the voters during the day and count them in the president machine. When you are ready, click on 'Vote registration'.

If you have problems scanning a vote, you can print it again by means of the 'regenerate barcode' option in the taskbar.

Thanks to the election closure process, you can change for the last time the election status to 'Election closed'. Afterwards you will not be able to scan any vote.

When you have scanned the last barcode and the authorized time for closing the election has been reached, click on 'Close election'.
