

Help for the installation of voting machines

To start this process you need to have:

- installed the voting machines with all the peripherals
- a smartcard reader correctly connected to the president machine
- a smartcard which will be used as reference card
- your eID card to automatically complete your personal data
- the installation report printed by the printer of the president machine during the first start-up

The voting machine installation process contains steps that need to be executed simultaneously in the president and voting machines:

- Create a reference card.
- Prepare the USB Flash for the installation of the voting machine.
- Initialize the voting machines in the polling station.

To install a voting machine, follow the following points:

1. When you press the 'Installation of voting machines' button on the principal screen, the installation process starts with screen Step 0.
2. Press 'Next' to go to screen Step 1. The process asks the user to insert the eID card or to manually fill out his data.
3. Insert the eID card or write the data.
4. Check the data. If these are correct press 'Confirm'.
5. If necessary, change the data and press 'Confirm' to go to screen Step 2.
6. Insert the smartcard into the card reader and press 'Next'.

7. When screen Step 3 appears, press the 'Next' button to program the smart card as reference card.
8. Remove the reference card from the card reader in screen Step 4.
9. When screen Step 5 appears, remove the back-up USB Flash from the president machine and press 'Next'.
10. Insert the back-up USB Flash into the USB port of the first voting machine of the polling station.
11. Switch on the voting machine.
12. Follow the instructions of the voting machine.
13. Insert the reference card when the voting machine asks for this.
14. Remove the back-up USB Flash from the USB port of the voting machine.
15. Repeat steps 10 to 14 for each voting machine of the polling station.
16. After having installed all the voting machines, insert the back-up USB Flash into the USB port of the president machine and press 'Next' on screen Step 7.
17. Press 'Next' on screen Step 7.
18. Press 'End' on screen Step 8.
