

Help for the card activation and closure of voting

You are in the fifth stage of the electoral process.

In this stage you can:

- Activate official cards.
- Close the voting stage.

The menu bar contains the following options:

- Go to menu
- Report a technical incident
- Install voting machines
- Manage poll workers
- Manage the comments of the poll station's president
- Manage the election statistics
- Activate replacement cards (for proxy or assisted voting)
- Test the reliability of the voting process

Thanks to the activation process of official cards, you can give access to the voting process to every classic voter. For this, click on 'Card activation'.

If you need to activate a card for a voter who needs assistance to cast his vote, you can click on the 'Activate assistant cards' button which is located in the bottom taskbar.

To close the voting process, you need to click on the 'Closure of voting' button. This will change the election status to 'Voting closed'. When this action is done, no more official cards can be activated. This action can be done once the card of the last voter has been activated.
