Help for the closure of voting

This process allows to change the election status from 'Open' to 'Voting Closed'. After this, no further official card can be activated to start a vote.

The president machine stays in this status until all ballots are scanned before closing the election.

To start this process you need:

- a smartcard reader connected to the president machine
- your eID card to automatically complete your personal data

To close the voting session you need to :

1. Wait until the last voter inserts his ballot into the ballot box, then click on 'Close voting'.
2. Insert your eID card into the reader to complete your personal data on the screen 'Official election data'.
3. Click on 'Confirm'.
4. Wait for the confirmation message 'Closure of voting' on the screen.
5. When you are ready, click on the red cross in the upper right part of the screen.
